Collaboration & Leadership: Event Branding & Promotion, Team Collaboration & Coordination, Public Speaking & Presentation

Technical Skills: Python Programming, C Programming, Data Analysis, JAVA

INTERSHIPS

UI Designer Intern — Humanity Founders

Jun 2026 – Jul 2026

- Worked as a UI/UX design intern across multiple live products in Figma under a manager and supervisor, translating product requirements into interactive design solutions.
- Designed a complete donor and NGO mobile app screen set for ManavSeva, and two full interactive HTML prototypes for CA Mitra.
- Collaborated on freelance-adjacent design and content strategy work for external clients, and maintained design documentation for the internship portal.

Intern — Udaar Foundation

- Conducted engaging teaching sessions, fostering curiosity and learning among students.
- Built strong bonds with learners, emphasizing trust, empathy, and collaboration.
- Collaborated with teaching staff to deliver impactful and inclusive educational experiences.

PROJECTS

ManavSeva — Donor-NGO Mobile Platform

- Designed a complete donor and NGO mobile app screen set in Figma across all four user roles — Donor, NGO, Beneficiary, and Admin.
- Iterated on the NGO dashboard through multiple rounds of feedback, restructuring the layout and introducing a tabbed structure.
- Converted web screens to mobile using an established brand system (dark green, bright green, cream).

CA Mitra — Website Connecting Startup Founders with Chartered Accountants

- Designed two full interactive HTML prototypes: an initial ledger/stamp-inspired aesthetic, followed by a modern fintech direction (white and blue-grey palette, Space Grotesk typography, teal accent).

DermaScope — AI Skin & Hair Analysis Platform

- Designed a full multi-page website in a maroon-and-pink palette for an AI-driven skin and hair diagnostics platform, with a focus on clean, accessible UI.

Smart Music Application

- Designed a Spotify-inspired web app with integrated song recognition, AI-powered recommendations, mood-based playlists, and light/dark mode for a personalised listening experience.

Architecture Website Design (Personal Project)

- Created a responsive and visually appealing website layout showcasing architectural concepts, with a focus on clean UI and modern design principles.
- Sign-In / Sign-Up Page**
- Designed and developed an interactive authentication page with user-friendly form validation and a modern aesthetic, built as a reusable UI component.
- MP3 Music Box**
- Developed a Python-Tkinter-based music player application that allows users to play, pause, stop, and manage MP3 files with a clean user interface.
